

Table Of Contents For The Hearing Exhibits

The PUC case docket for my two complaints contains an entry for exhibits presented during the November 25, 2024 hearing. Here is a link to those exhibits: [LINK](#)

The contents of the exhibits are as follows:

The first five items are from my Trucking Complaint:

#1 - PDF page 4 is my Exhibit A. It is also Aqua's Schedule C-1 showing operating expenses for their New Garden operation. Line 22 is for "*Purchased Wastewater*". It shows \$1,200,000 for all three categories of "*Present Rates*" through 3/31/2023. The source document was PDF page 662 of Aqua's "*Rate Case – Volumes 1 through 5*". Here is a link to that filing: [LINK](#)

#2 - PDF page 5 is my Exhibit B. It is Aqua's Schedule C-7.1 showing that the service provider for their "*Purchased Wastewater Treatment Expense*" is Brandywine Septic. The source document was PDF page 682 of Aqua's "*Rate Case – Volumes 1 through 5*". See item #1 for the link to this document.

#3 - PDF page 5 is my Exhibit C. It is Marc Lucca's letter to New Garden customers dated December 9, 2022. The key part is the statement s of this letter is: "*After several months, we replaced hauling with a pipeline connecting the two treatment plants.*" [emphasis added]

#4 - PDF page 7 is my Exhibit D. It is PDF page 24 from Aqua's 2021 annual report to the PUC for the year 2021. It shows that Aqua's pipeline activation project was complete by 12/31/2021. Here is a link to that report: [LINK](#)

#5 - PDF pages 8 – 13 are the text of my trucking complaint as originally filed.

The next eight items relate to my consumption volume complaint.

#6 - PDF pages 14 – 19 are Aqua's consumption volume filings.

#7 - PDF pages 20 – 23 are my consolidation of Aqua's consumption volumes.

#8 - PDF pages 24 – 25 validate the accuracy of the consolidation.

#9 - PDF pages 26 – 29 detail the residential consumption volume issue.

#10 - PDF page 30 is a commercial sewer bill with a volume greater than 15,000 gallons. That disproved Aqua's data showing that no commercial customer used over 15,000 gallons per quarter.

#11 - PDF page 31 is a table from New Garden tabulating use distribution by residential customers in New Garden.

#12 - PDF page 32 is Aqua's consumption data from the 2/21/2020 Settlement Agreement that led to Aqua's purchase of the New Garden system. The volumes are identical Aqua's 2021 rate file, but predate the acquisition by 10 months.

#13 - PDF page 33 is my estimate of actual rate increase for New Garden customers.

#14 - PDF pages 34 – 50 are the text of my consumption volume complaint.

The remaining items are all Aqua's Exhibits:

#15 - PDF pages 51 – 107 = Aqua's Exhibit 1-G. It is Aqua's entire financial section for New Garden in 2021 rate filing. Two key pages:

A) - PDF page 63 = my Exhibit A on PDF page 4. It is the \$1,200,000 annual cost.

B) - PDF page 83 = my Exhibit B on PDF page 5. It identifies Brandywine Septic as the service provider.

#16 - PDF pages 108 – 287 = Aqua's Exhibit 5-B. There is mind numbing detail about cost allocations and how revenue would be derived.

#17 - PDF pages 288 – 289 = Aqua's Exhibit A. It is a copy of PDF pages 19 – 20 of the Recommended Decision for Aqua's 2021 rate case. Those pages summarize the input two neighbors and I gave at the November 12, 2021 public hearing for the rate case. Here is a link to the RD: [LINK](#)

#18 - PDF pages 290 – 801 = Aqua's Exhibit B. It is the entire 512 pages of the "Opinion and Order" for Aqua's 2021 rate case. Nothing directly addresses my complaints.

#19 - PDF pages 802 – 963 = Aqua's Exhibit C. It is Aqua's May 23, 2022 compliance and tariff filing with the PUC. This is the filing from which I discovered the consumption volume issue.

#20 - PDF pages 964 – 965 = Aqua's Exhibit D. It is a letter from the PUC essentially accepting Aqua's compliance and tariff filing.

#21 - PDF page 966 – 995 = Aqua's Exhibit E. It is 30 pages of detailed revenue data from Aqua's 2024 rate filing. The source document is PDF pages 273 – 302 of Aqua's volume 5 filing on 5/23/2024. Here is a link to that filing: [LINK](#)
